

Product: Bike Racks

- The **bike racks** are custom fabricated using recycled 2 1/2 in. square tubing, and recycled 2 in pipe.
- Designed to hold two bikes each providing a secure and attractive hitch.
- Installed with bolts to existing sidewalk or in a poured concrete footing for off street applications.
- **No two are alike.** The **bike racks** are created by many different artists, making each one unique. The basic functional elements are the same, but the *lockto arms* shapes will vary.
- Fabricated at our shop, and finished with any color paint desired.
- Large *lockto arms* allow for a diverse range of bike sizes and shapes to be easily secured.
- Attractive and safe the **bike racks** create larger shapes and presence with their installation in groups.
- Made in providence by local craftspeople in an educational setting, the **bike racks** can be customized for individual applications.
