

**Product:** Tree Guards

- The tree guards are custom fabricated using recycled 3/4 inch sold round steel.
- The mulch barrier is constructed out of recycled 1/8 inch sheet steel.
- Designed to contain mulch while remaining open enough to easily be cleaned and maintained.
- Can be fabricated with variable dimensions to accommodate diverse installations.
- Can be secured invisibly with brackets underneath existing sidewalk squares, or made to bolt securely onto the sidewalk surface.
- Welded in place and finished with any color of paint desired.
- Expected to allow most trees a 15-20 years of protected growth with minimal maintenance.
- Design developed with the assistance of Providence's tree expert for maximum tree protection and health.
- Made in Providence by local craftspeople in an educational setting, the tree guards can be customized for individual applications.
